

# Business Requirements Document

## 1. Project Overview

**Project:** Product Catalogue & Ordering Website

**Objective:**

Membangun website yang memungkinkan seller mengelola dan menampilkan produk, sementara buyer dapat melihat produk, melakukan pemesanan, pembayaran, mendapatkan digital ticket/order, dan melakukan pickup pada hari yang ditentukan.

## 2. User Roles

| Role   | Responsibility                                          |
|--------|---------------------------------------------------------|
| Admin  | Mengelola platform, akun, dan data yang diperlukan      |
| Seller | Mengelola produk, harga, dan informasi produk           |
| Buyer  | Mencari produk, melakukan order, pembayaran, dan pickup |

## 3. Business Process

### Seller Flow

Seller Login

Seller Dashboard

Set Up Product

Input Product Information

Set Price

Product Published

Product Appears in Catalogue

Seller kemungkinan perlu memasukkan:

- Product name
- Product description
- Product image
- Price
- Stock/availability
- Seller information
- Product category

## Buyer Flow

Sign Up / Login

Browse Product Catalogue

Select Product

View Product Details

Shopping Cart

PO / Payment

Digital Ticket / Order

Hari H

Pick Up

## 4. Functional Requirements

### FR-01 — User Authentication

System shall allow users to:

- Sign up
- Log in
- Log out
- Access features according to their role

## **FR-02 — Product Catalogue**

System shall:

- Display available products
- Display product information
- Display price
- Allow buyer to browse products
- Allow buyer to select/view product details

## **FR-03 — Product Management**

Seller shall be able to:

- Add product
- Edit product
- Set product price
- Update product information
- Manage product availability

## **FR-04 — Shopping Cart**

Buyer shall be able to:

- Add products to cart
- View cart
- Modify order
- Remove products
- Proceed to payment

## **FR-05 — Order & Payment**

System shall:

- Create an order
- Record buyer information
- Record purchased products
- Record payment status
- Confirm successful payment

## FR-06 — Digital Ticket / Order

After successful payment, system shall provide:

- Digital order/ticket
- Order ID
- Product/order details
- Pickup information

## FR-07 — Pickup

Buyer shall be able to use their order/ticket for pickup on the designated day.

## 5. Seller & Customer Data

Dari tulisan "**Cust ID**", "**Pembeli**", dan "Payment OK", kemungkinan sistem membutuhkan:

### Customer

- Customer ID
- Name
- Contact information
- Order history
- Payment status

### Seller

- Seller ID
- Seller name
- Contact information
- Product list

### Order

- Order ID
- Customer ID
- Product ID
- Quantity

- Total price
- Payment status
- Pickup status

## 6. Admin Requirements

Admin kemungkinan memiliki akses untuk:

- Login ke admin panel
- Manage seller accounts
- Manage buyer/customer data
- Manage products
- Monitor orders
- Monitor payment status
- View reports

Papan juga tampaknya menyebut "laporan harian", sehingga bisa diterjemahkan menjadi: Daily Sales / Transaction Report

yang berisi misalnya:

- Total orders
- Successful payments
- Cancelled orders
- Products sold
- Revenue
- Pickup status

## 7. Non-Functional Requirements

Beberapa requirement yang secara logis diperlukan:

| Requirement | Description                              |
|-------------|------------------------------------------|
| Security    | Data akun dan transaksi harus dilindungi |

| Requirement    | Description                                                  |
|----------------|--------------------------------------------------------------|
| Performance    | Catalogue dan halaman produk harus dapat dimuat dengan cepat |
| Availability   | Website dapat diakses selama periode penjualan               |
| Usability      | Buyer dapat melakukan order dengan langkah yang sederhana    |
| Scalability    | Sistem dapat menangani peningkatan jumlah buyer/order        |
| Data Integrity | Status payment dan order harus konsisten                     |

## 8. End-to-End Business Flow

Kalau semua tulisan di papan digabungkan, saya akan menerjemahkannya menjadi:
